THE PROBLEM

Your customers live on WhatsApp. Your stack doesn't.

Email open rates have collapsed. SMS is expensive and one-way. Generic chatbots feel robotic. Meanwhile your team copy-pastes between a CRM, a helpdesk, three spreadsheets and a personal phone — losing leads at every handoff.

Leaky funnels

Form fills disappear into inboxes nobody checks. WhatsApp pings get lost in personal phones.

Manual broadcasts

Spreadsheets, copy-paste, banned numbers. No segmentation, no analytics, no compliance.

Disconnected tools

CRM, helpdesk, marketing, payments — each talking to nobody. Data dies in silos.

Slow response

Customers expect replies in minutes. Your team replies in hours, after switching 4 tabs.

> "We were paying for five tools and still missing leads. Maxify replaced our broadcast app, chatbot, helpdesk and half our CRM in one week."
>
> — Sameer A., Web Strategist, Diwizon Dynamics Pvt. Ltd.

THE SOLUTION

One platform. Every WhatsApp use case.

Maxify is a multi-tenant SaaS built on the official WhatsApp Cloud API. Connect your number, import contacts, and run growth, sales and support from a single workspace.

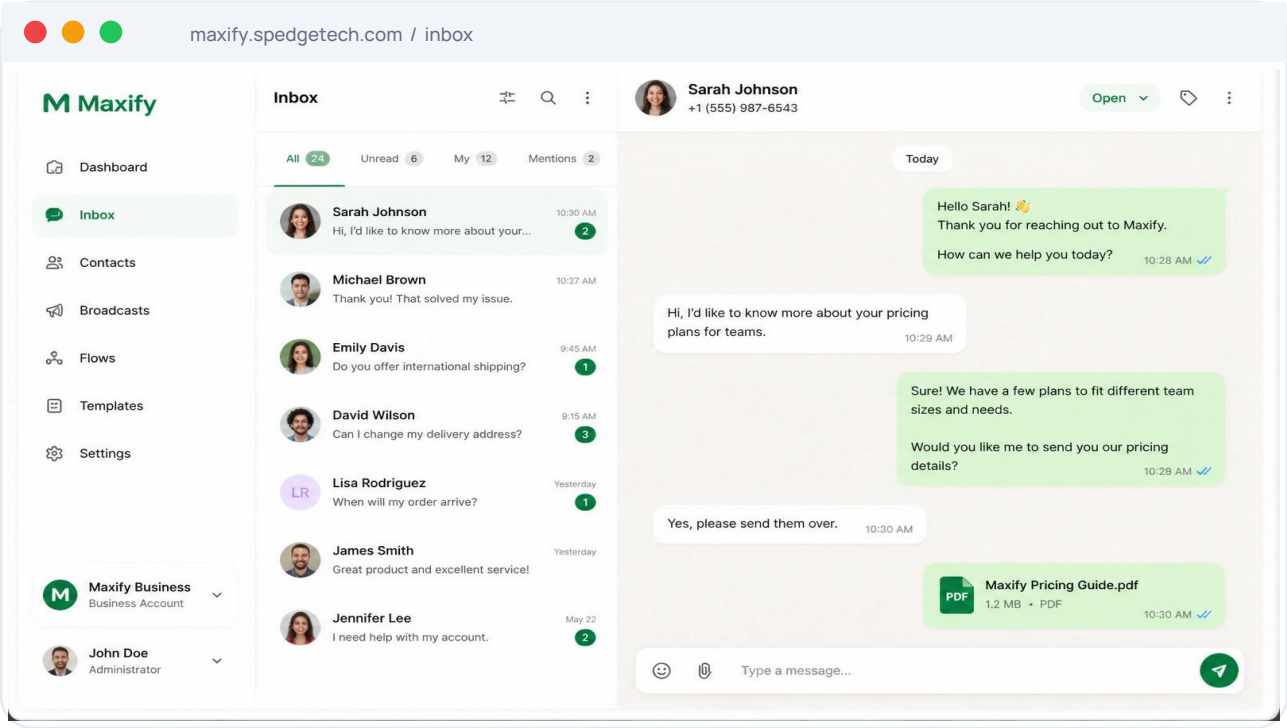

Image shown for demonstration purposes only.

Why Maxify

- **Official Cloud API**
  Direct integration with Meta — no proxies, no bans.
- **Built for teams**
  Roles, assignments, internal notes, audit trail.
- **Composable flows**
  Drag-and-drop with API, conditions, AI and human handoff.
- **Data you own**
  Multi-tenant isolation with row-level security.

FEATURES

Everything you need, nothing you don't.

Smart Inbox

Unified team inbox with assignments, tags, internal notes and instant search across every conversation.

Broadcast Campaigns

Segmented sends with template approval status, rate limits and live delivery analytics.

Visual Flow Builder

Drag-and-drop flows with conditions, delays, APIs, AI replies and human handoff.

Native WhatsApp Flows

Build in-app forms with document and photo pickers — rendered natively by WhatsApp.

Templates Studio

Submit, edit and track Meta template approvals with dynamic variable mapping.

Automations & APIs

Trigger flows from webhooks, push data to your CRM, sync orders and tickets.

How it works

01 **Connect**
Plug in your WhatsApp Cloud API number.

02 **Import**
Upload contacts (auto-deduplicated by phone).

03 **Design**
Build templates, flows and forms visually.

04 **Launch**
Broadcast, automate and reply at scale.

Maxify
MAXIMIZE EVERY MESSAGE.

WHY MAXIFY

Maxify vs the alternatives.

Capability	Maxify	Generic chatbots	DIY scripts
Official Cloud API	✓	✗	✓
Visual flow builder	✓	✓	✗
Native WhatsApp Flows	✓	✗	✗
Team inbox + roles	✓	✗	✗
Auto contact dedupe	✓	✗	✗
Template approval flow	✓	✗	✗
Multi-tenant ready	✓	✗	✗
Time to launch	**minutes**	hours	weeks

Built to pay for itself in the first campaign.

Replace 4-5 point tools with one workspace. Stop losing leads in personal phones. Send compliant campaigns that actually get opened.

READY WHEN YOU ARE

Make WhatsApp your best channel.

Spin up your workspace in minutes. Bring your number, import your contacts, and launch your first campaign today.
